**RESOLUTION OF THE IOWA NORTHLAND REGIONAL
TRANSPORTATION AUTHORITY POLICY BOARD**

WHEREAS, the Iowa Northland Regional Transportation Authority has been designated as the Regional Planning Affiliation for Black Hawk, Bremer, Buchanan, Butler, Chickasaw, and Grundy Counties; and

WHEREAS, the Policy Board, in cooperation with the state, is conducting a continuing, cooperative, and comprehensive (3-C) transportation planning process pursuant to 23 CFR 450 (b); and

WHEREAS, the FY 2025-2028 Transportation Improvement Program (TIP) is a product of this ongoing planning process; and

WHEREAS, the Policy Board has included the open participation of the public in the development of the TIP in conformance with the Board's approved Public Participation Plan; and

WHEREAS, the FY 2025 selection year of the highway, transportation alternatives, and transit elements of the TIP are financially feasible based upon anticipated federal, state, and local resources.

NOW, THEREFORE BE IT RESOLVED that the Iowa Northland Regional Transportation Authority Policy Board hereby approves the Final FY 2025-2028 Transportation Improvement Program.

Passed and adopted this 18th day of July, 2024.

Dewey Hildebrandt, Vice-Chair

ATTEST:

Nick Fratzke, Director of Transportation, INRCOG

INTRODUCTION

This document is the FY 2025-2028 Transportation Improvement Program (TIP) for the Iowa Northland Regional Transportation Authority (RTA). The TIP contains all transportation projects in the RTA area anticipated to receive federal-aid in the next four federal fiscal years. The TIP is a programming document required by federal law which serves as a transition point for projects consistent with the area's Long-Range Transportation Plan to be moved forward into programming and construction.

The planning and programming process required of the RTA is outlined in the 2021 federal transportation bill, the Infrastructure Investment and Jobs Act (IIJA). Prior to IIJA's approval, the RTA had been operating under the previous federal transportation legislation, Fixing America's Surface Transportation (FAST) Act. IIJA continues, and further strengthens, the requirement that an extensive, ongoing, and cooperative planning effort for the programming of federal funds be undertaken. The RTA's overall transportation planning goal is to provide for the safe, adequate, and efficient movement of persons and goods in the area. The RTA will utilize IIJA's planning factors to help reach this goal, which are as follows:

- Support the economic vitality of the metropolitan area, especially by enabling global competitiveness, productivity, and efficiency
- Increase the safety of the transportation system for motorized and non-motorized users
- Increase the accessibility and mobility of people and for freight
- Protect and enhance the environment, promote energy conservation, improve the quality of life, and promote consistency between transportation improvements and State and local planned growth and economic development patterns
- Enhance the integration and connectivity of the transportation system, across and between modes, for people and freight
- Promote efficient system management and operation
- Emphasize the preservation of the existing transportation system
- Improve the resiliency and reliability of the transportation system and reduce or mitigate stormwater impacts on surface transportation
- Enhance travel and tourism

The TIP is a step in the process of meeting these goals, as it enables projects to receive federal-aid. This includes not only street and highway projects, but transit, bicycle, and pedestrian projects. Projects must be included in the TIP to receive federal aid; however, inclusion of a project in the TIP does not guarantee federal-aid eligibility. This is determined on a case-by-case basis when project authorization is requested from the Federal Highway Administration (FHWA) or Federal Transit Administration (FTA).

The TIP is updated annually. Each year, the RTA Bicycle and Pedestrian Advisory Committee (BPAC) and Transportation Technical Committee (TTC) hold work sessions to rank and program Transportation Alternatives Setaside Program (TASA) projects, and to program Surface Transportation Block Grant Program (STBG) and STBG-Swap projects for the region. A draft TIP is compiled, distributed to the RTA Policy Board and TTC for review, and taken out for public input. The draft document is posted on the website, and at least two public input sessions are held to solicit public comments. The draft TIP is also submitted to the Iowa Department of Transportation (DOT), FHWA, and FTA for review. Comments from these agencies and the public are incorporated into the draft document, and then a public hearing is held, and a final version of the document is considered for approval by the RTA Policy Board. The final TIP is posted on the website and forwarded to the Iowa DOT, FHWA, and FTA. The Iowa DOT then produces the Statewide Transportation Improvement Program (STIP) by compiling TIPs from all Metropolitan Planning Organizations (MPOs) and Regional Planning Affiliations (RPAs) in Iowa.

FUNDING

Projects identified in local TIPs utilize, or are based upon, several different sources of federal funding. The primary sources of FHWA funding to Iowa, which are in part used to fund local efforts, include the following:

- Bridge Formula Program (BFP) – The BFP provides funding dedicated to replace, rehabilitate, preserve, protect, and construct highway bridges. BFP funds are apportioned to states on a formula basis. A significant portion of Iowa's BFP funds will be utilized to implement bridge construction projects in cities and counties through the Iowa DOT's City Bridge Program and by directly targeting BFP funds to Iowa's 99 counties.
- Carbon Reduction Program (CRP) – CRP provides funding for projects designed to reduce transportation emissions, defined as carbon dioxide emissions from on-road highway sources. A portion of this funding will be awarded to MPOs but not RPAs.
- Congestion Mitigation and Air Quality Improvement Program (CMAQ) – CMAQ provides flexible funding for transportation projects and programs tasked with helping to meet the requirements of the Clean Air Act. These projects can include those that reduce congestion and improve air quality.
- Discretionary Grants (GRNT) – The FHWA administers discretionary grant programs through various offices representing special funding categories. Examples of discretionary grant awards include awards from programs including Rebuilding American Infrastructure with Sustainability and Equity (RAISE), Nationally Significant Multimodal Freight and Highway Projects (INFRA), National Infrastructure Project Assistance Program (MEGA), and Rural Surface Transportation Grant Program among others.
- Earmark (ERMK) – Projects with funding identified directly in federal Authorization or Appropriations bills are considered earmark funds. The projects are funded with money set aside for Community Project Funding/Congressionally Directed Funding and awarded by members of Congress.
- Federal Lands Access Program (FLAP) and Tribal Transportation Program (TTP) – The FLAP Program provides funding for projects that improve access within, and to, federal lands. The FLAP funding will be distributed through a grant process where a group of FHWA, Iowa DOT, and local government representatives will solicit, rank, and select projects to receive funding. The TTP provides safe and adequate transportation and public road access to and within Indian reservations and Indian lands. Funds are distributed based on a statutory formula based on tribal population, road mileage, and average tribal shares of the former Tribal Transportation Allocation Methodology.
- Highway Safety Improvement Program (HSIP) – This is a core federal-aid program that funds projects with the goal of achieving a significant reduction in traffic fatalities and serious injuries on public roads. A portion of this funding is targeted for use on local high-risk roads and railway-highway crossings.
- Metropolitan Planning Program (PL) – FHWA provides funding for this program to the State of Iowa based on urbanized area population. The funds are dedicated to support transportation planning efforts in urbanized areas with a population of 50,000 or greater.
- National Highway Freight Program (NHFP) – NHFP funds are distributed to states via a formula process and are targeted towards transportation projects that benefit freight movements. Ten percent of NHFP funds will be targeted towards non-DOT sponsored projects.
- National Highway Performance Program (NHPP) – NHPP funds are available to be used on projects that improve the condition and performance of the National Highway System (NHS), including some state and U.S. highways and interstates.
- State Planning and Research (SPR) – SPR funds are available to fund statewide planning and research activities. A portion of SPR funds are provided to RPAs to support transportation planning efforts.
- Surface Transportation Block Grant Program (STBG) – This program is designed to address specific issues identified by Congress and provides flexible funding for projects to preserve or improve the condition/performance of transportation facilities, including any federal-aid highway or public road bridge. STBG funding may be utilized on roadway projects on federal-aid routes, bridge projects on any public road, transit capital improvements, TASA eligible activities, and planning activities. Iowa targets STBG funding to each of its 27 MPOs and RPAs on an annual basis for programming based on regional priorities. RPA STBG funds awarded to cities are eligible to be swapped for state Primary Road Funds.
- Transportation Alternatives Setaside Program (TASA or TAP) – This program is a setaside from the STBG program. TASA provides funding to expand travel choices and improve the transportation experience. TASA projects improve the cultural, historic, aesthetic, and environmental aspects of transportation infrastructure. Projects can include the creation of bicycle and pedestrian facilities, and the restoration of historic transportation facilities, among others. Iowa targets TASA funding to each of its 27 MPOs and RPAs on an annual basis for programming based on regional priorities. All projects programmed with TASA funds are required to be verified by the Systems Planning Bureau to ensure compatibility with TASA eligibility.

In addition to these federal funding sources, the Iowa DOT administers several grant programs. Projects awarded grant funding must be documented in the region's TIP. These grant awards are distributed through an application process. Applications are due October 1 for projects requesting funding in the next fiscal year. State administered grant programs include the following:

- City Bridge Program – A portion of STBG funding dedicated to local bridge projects is set aside for the funding of bridge projects within cities. Eligible projects need to be classified as structurally deficient or functionally obsolete. Projects are rated and prioritized by the Local Systems Bureau with awards based upon criteria identified in the application process. Projects awarded grant funding are subject to a federal-aid obligation limitation of \$1,500,000.
- Highway Safety Improvement Program – Local (HSIP-Local) – This program is funded using a portion of Iowa's Highway Safety Improvement Program apportionment and funds safety projects on rural roadways. Federal HSIP funding targeted towards these local projects is swapped for Primary Road Fund dollars.
- Iowa Clean Air Attainment Program (ICAAP) – The ICAAP funds projects that are intended to maximize emission reductions through traffic flow improvements, reduced vehicle-miles of travel, and reduced single-occupancy vehicle trips. This program utilizes \$4 million of Iowa's CMAQ apportionment.
- Recreational Trails Program – This program provides federal funding for both motorized and nonmotorized trail projects and is funded through a takedown from Iowa's TASA funding. The decision to participate in this program is made annually by the Iowa Transportation Commission.
- Statewide Transportation Alternatives Program – This program makes available federal TASA funds to locally sponsored projects that expand travel choices and improve the motorized and nonmotorized transportation experience.

There are also several federal transit programs that provide funding. The largest amount of funding is distributed, by formula, to states and large metropolitan areas. Other program funds are discretionary, and some are earmarked for specific projects. Federal transit programs include the following:

- Metropolitan Transportation Planning program (Section 5303 and 5305) – FTA provides funding for this program to the state based on its urbanized area populations. The funds are dedicated to support transportation planning projects in urbanized areas with more than 50,000 persons.
- Statewide Transportation Planning program (Section 5304 and 5305) – These funds come to the state based on population and are used to support transportation planning projects in nonurbanized areas. They are combined with the Section 5311 funds and allocated among Iowa's RPAs.
- Urbanized Area Formula Grants program (Section 5307) – FTA provides transit operating, planning and capital assistance funds directly to local recipients in urbanized areas with populations over 50,000. Assistance amounts are based on population and density figures and transit performance factors for larger areas. Local recipients must apply directly to the FTA.
- Bus and Bus Facilities Program (Section 5339) – This funding source is split into three categories: formula, discretionary, and low or no emission vehicle projects. The formula program provides federal assistance for major capital needs, such as fleet replacement and construction of transit facilities. All transit systems in the state are eligible for this program and projects are selected through the PTMS process. The discretionary bus and bus facilities grant program, or 5339(b), is a competitive grant program. Iowa DOT typically submits a statewide application on behalf of Iowa public transit agencies and uses the vehicle replacement list generated by the PTMS rankings as the basis for the project submitted. The low or no mission vehicle program, 5339(c), provides funding for alternative power or fuel vehicles and/or facilities. Iowa DOT will submit an application for transit agencies interested in those technologies. For the 5339(b) and 5339(c) programs, larger public transit agencies serving populations over 50,000 can apply directly to FTA if they desire.
- Enhanced Mobility of Seniors and Individuals with Disabilities Program (Section 5310) – Funding is provided through this program to increase mobility for the elderly and persons with disabilities. Part of the funding is administered along with the nonurbanized funding with the remaining funds allocated among urbanized transit systems in areas with a population of less than 200,000. Urbanized areas with more than 200,000 in population receive a direct allocation.
- Formula Grants for Rural Areas (Section 5311) – This program provides capital and operating assistance for rural and small urban transit systems. Fifteen percent of these funds are allocated to intercity bus projects. A portion of the funding is also allocated to support rural transit planning. The remaining funds are combined with the rural portion of Section 5310 funds and allocated among regional and small urban transit systems based on their relative performance in the prior year.
- Rural Transit Assistance Program (RTAP) (Section 5311(b)(3)) – This funding is used for statewide training events and to support transit funding fellowships for regional and small urban transit staff or planners.
- FHWA Flexible funds – Certain Title 23 funds may be used for transit purposes. Transit capital assistance is an eligible use of STBG funds. Transit capital and startup operating assistance is an eligible use of CMAQ/ICAAP funds. When CMAQ/ICAAP and STBG funds are programmed for transit projects, they are transferred to the FTA. The CMAQ/ICAAP funds are administered by the Iowa DOT's Public Transit team. STBG funds for small urban and regional transit systems are also administered the Public Transit team.

State funds available for transit include the following:

- State Transit Assistance (STA) – All public transit systems are eligible for funding. These funds can be used by the public transit system for operating, capital, or planning expenses related to the provision of open-to-the-public passenger transportation. The majority of the funds received in a fiscal year are distributed to individual transit systems on the basis of a formula using performance statistics from the most recent available year.
- STA Fellowship Program – Each year \$125,000 is set aside from the total STA funds to provide large urban transit systems not eligible for RTAP funding with fellowships to attend transit training conferences and seminars or to purchase transit-related training materials.
- STA Special Projects – The Iowa DOT sets aside approximately \$175,000 annually from the State Transit Assistance (STA) fund for Special Projects. Special Projects are extraordinary, emergency, or innovative in nature. Grants can include projects which support transit services developed in conjunction with human service agencies or local community partners or statewide projects to improve public transit in Iowa. Projects are intended to assist with start-up of new services that have been identified as needs by health, employment or human service agencies or other community partners. Statewide projects may be used on transit marketing and projects exploring new transit technologies. Applications are available to public transit agencies through the BlackCat software.
- Public Transit Infrastructure Grant Fund – This is a state program that can fund transit facility projects that involve new construction, reconstruction, or remodeling. To qualify, projects must include a vertical component. Project applications are due the first business day of May each year through the BlackCat software.

The RTA has two pools of federal-aid to program towards projects: STBG/STBG-Swap, and TASA. Annual funding target averages for the next four federal fiscal years are \$2,024,000 for STBG/STBG-Swap and \$312,000 for TASA.

The *Funding by Year and Program* table shows the total costs and anticipated federal-aid for all programs. Projects anticipated receiving funding from any of the mentioned federal-aid programs in FY 2025-2028 are listed in the *Program of Projects*. This document also includes a *FY 2024 Project Status Report* as of July 18, 2024.

FINANCIAL INFORMATION AND FISCAL CONSTRAINT

The Iowa DOT Program Management Bureau provides the RTA with estimated STBG/STBG-Swap and TASA funding targets for each of the four years in the TIP. The total amount of federal-aid that is allocated to projects cannot exceed the amount expected to be available. Also, project costs must be estimated in year of expenditure (YOE) dollars. The RTA expects project sponsors to ensure project costs are in YOE dollars. Each year, projects that were previously in the TIP but delayed are reevaluated to ensure the estimated cost is still accurate and adjusted if necessary. For projects in future fiscal years, local sponsors are expected to use a four percent per year inflation rate. The Iowa DOT is responsible for its project costs and uses a four and a half percent per year inflation rate. Fiscal constraint for STBG/STBG-Swap and TASA is demonstrated in the *Funding by Year and Program* section of this document. Fiscal constraint for all other programs is evaluated at a statewide level by the Iowa DOT.

Each year prior to development of the Iowa DOT's Five-year Program and the Statewide Transportation Improvement Program, both state and federal revenue forecasts are completed to determine the amount of funding available for programming. These forecasts are a critical component in the development of the Five-year Program and as such are reviewed by the Iowa Transportation Commission. The primary sources of state funding to the Iowa DOT are the Primary Road Fund and TIME-21. These state funds are used for the operation, maintenance, and construction of the Primary Road System. The amount of funding available for operations and maintenance are determined by legislative appropriations. Additional funding is set aside for statewide activities including engineering costs. The remaining funding is available for right-of-way and construction activities associated with the highway program.

Along with the state funds, the highway program utilizes a portion of the federal funds that are allocated to the state. A federal funding forecast is prepared each year based on the latest apportionment information available. This forecast includes the various federal programs and identifies which funds are allocated to the Iowa DOT for programming and which funds are directed to locals through the MPO and RPA planning process, Highway Bridge Program, and various grant programs. Implementation of a federal-aid swap will increase the amount of federal funds that are utilized by the Iowa DOT.

The Iowa DOT's Five-year Program can be found at www.iowadot.gov/program_management/five-year-program.

REDEMONSTRATION OF FISCAL CONSTRAINT

The Iowa DOT is required to ensure that federal-aid funds programmed in the STIP are fiscally constrained not only at the time of approval but also throughout the fiscal year. As part of the draft STIP process, the Iowa DOT adjusts its federal-aid participation to utilize all remaining federal funds after local project sponsors have programmed their federal-aid projects. Based on this approach, at the time of approval by FHWA and FTA, no additional federal-aid funds are available to be added to the STIP and maintain fiscal constraint of the document.

To maintain fiscal constraint of the STIP document, any revision to a federal-aid project in the STIP that adds a new federal-aid project or increases a project's STIP limit will require that a corresponding change be made to another programming entry. The federal-aid funds moved to make way for the additional programmed federal-aid need to be of the same federal-aid program type. For example, if additional STBG funds are going to be added to a project, the corresponding reduction in federal-aid on another project must be STBG funds. This requirement pertains to both administrative modifications and amendments to the STIP and therefore also applies when moving projects up from the out years of the STIP.

The requirement to ensure fiscal constraint does not apply to accomplishment year projects that have been already programmed at their full federal-aid participation rate (typically 80 percent) and whose programming entry is being adjusted based on an updated cost estimate. That would include all projects that have been programmed with an 80/20 or 90/10 split. For those projects, it is anticipated that any increases in cost estimates will be balanced out by projects whose authorized federal-aid is less than what was programmed.

PROJECT SELECTION

SURFACE TRANSPORTATION BLOCK GRANT PROGRAM (STBG)

The RTA solicited projects for STBG funds in November 2023. Applications were due by March 15, 2024. The funding guidelines, funding flyer, and application form were made available on the RTA Funding Opportunities webpage. City bridges to receive funding are selected by the Iowa DOT. City bridge projects are selected based on a priority ranking system at the statewide level. County bridge projects are selected by each individual county based on its methodology. The methods used by counties in the region for selecting bridge projects are described in *Appendix 2*.

Eligible Activities and Requirements

- Eligible activities
 - Road and bridge new construction and reconstruction
 - Road resurfacing, restoration, or rehabilitation (3R), excluding straight overlay projects
 - Transit capital projects
 - Infrastructure-based Intelligent Transportation System (ITS) improvements
 - Roadway and transit safety infrastructure improvements
 - The installation of electric vehicle charging infrastructure and vehicle-to-grid infrastructure
 - Projects eligible under the RTA's Transportation Alternatives Program (TASA) Guidelines
- Ineligible activities
 - Preliminary and final design/engineering
 - Construction engineering/construction related services
 - Right-of-way acquisition
 - Corridor planning studies
 - Utility relocation
 - Sidewalk maintenance
- Roadway projects must be on federally classified routes that are Major Collectors or above.
- Projects must be consistent with the goals of the *RTA Long-Range Transportation Plan*.

- City projects will be programmed with STBG Swap funds. All other projects will be programmed with federal STBG funds.
- STBG and STBG Swap projects are eligible for up to 80 percent of the total estimated eligible project cost.
- Projects submitted for consideration will be reviewed by RTA Staff for eligibility prior to the TTC meeting.
- Incomplete applications or late applications will not be considered for funding.

Project Selection and Programming

- Projects will be reviewed at the Technical Committee meeting.
- Each project sponsor will be given the opportunity to present their project.
- The Technical Committee shall prioritize projects for funding by considering the ability to meet the RTA Long-Range Transportation Plan Goals, Objectives, and Performance Measures (see *Appendix A*) and funding constraints.
- The Technical Committee has the discretion to recommend the share of STBG funds for each recommended project.
- The Technical Committee may utilize the RTA's Funding Equity Guidelines to recommend projects.
- Projects recommended for STBG funds will be incorporated into the draft Transportation Improvement Program (TIP), distributed to the Policy Board for review, and taken out for public comment. The draft document will also be submitted to the Iowa DOT, FHWA, and FTA for review. Comments from these agencies and the public will be incorporated into the final document and presented to the Policy Board for adoption.
- The Policy Board has the ultimate decision-making authority. The Policy Board shall review and approve the allocation of all STBG and STBG Swap projects within the final TIP.
- Upon approval of the final TIP by the Policy Board, the RTA shall forward an *STBG Award Letter* to the recipient.

TRANSPORTATION ALTERNATIVES SET-ASIDE PROGRAM (TASA)

IJA requires that projects funded through TASA be selected using a competitive project selection process. The goal is to increase transparency, openness, objectivity, and to improve overall project quality. The RTA uses a project ranking process.

The RTA solicited candidate projects for TASA funds in November 2023. Applications were due by February 9, 2024. The funding guidelines, funding flyer, and application forms were made available on the RTA Funding Opportunities webpage.

Program Purposes and Basics

- The Transportation Alternatives Set-Aside (TA Set-Aside) from the Surface Transportation Block Grant Program (23 U.S.C. 133(h)) was authorized by the Infrastructure Investment and Jobs Act (IIJA) that was enacted in November 2021. In the published program guidance, the Federal Highway Administration (FHWA) has several aims for the program:
 1. To encourage the investment in projects that upgrade the condition of streets, highways, and bridges, and to create a modern transportation network that is safe for all users
 2. To provide choice across all modes
 3. To accommodate new and emerging technologies
 4. To make the network sustainable and resilient
 5. To ensure the network is more equitable
- TA Set-Aside funds should be used for the repair, rehabilitation, reconstruction, replacement, and maintenance of existing transportation infrastructure, especially the incorporation of safety, accessibility, multi-modal, and resilience features.
- Applicants should consider the safety of all users in project development and use TA Set-Aside funds to address safety whenever possible.
- Consideration should be given for projects and inclusion of project elements that proactively address workforce development and economic development or remove barriers to opportunity such as automobile dependence.
- Funds that have been selected through a competitive process can be “flexed” to the Federal Transit Administration (FTA) to fund projects for transit agencies and used for transit projects to further the goal of providing an equitable and safe transportation network for travelers of all ages and abilities.
- Funded projects will be carried out under the same rules and procedures as a federally funded highway project. This subjects all projects to Davis-Bacon Act prevailing wage requirements and other applicable federal-aid requirements (e.g., Build America, Buy America, planning, environmental review, letting, etc.). Project sponsors should expect to devote considerable time and resources toward following the federal requirements necessary for their project to be successfully completed.
- For construction projects, the project must be constructible as an independent project and identify a specific project location (including logical project termini where applicable).
- All applications must be accompanied by an official endorsement from the project sponsor (i.e., fully executed resolution by the elected body or board). The endorsement must provide written assurance that the project sponsor will adequately maintain the completed project for its intended public use following the project completion (for most construction projects, this will be a minimum of 20 years) and acknowledge the intent of the project sponsor to provide all funds required to complete the project beyond any TA Set-Aside award.
- TA Set-Aside program funds may reimburse up to 80 percent of eligible project costs or up to the approved grant maximum, whichever is less. A non-federal match is required to pay for a minimum of 20 percent of the remaining project costs.
- Construction projects must have a minimum total project cost of \$100,000 and a minimum federal-aid participation level of 50 percent.

Eligible and Ineligible Activities

- Eligible activities are described in 23 U.S.C. 101(1)(29) or 23 U.S.C. 213. Eligible activities include the following:
 1. Transportation Alternatives
 - a) Construction, planning, and design of on-road and off-road trail facilities for pedestrians, bicyclists, and other non-motorized forms of transportation, including sidewalks, bicycle infrastructure, pedestrian and bicycle signals, traffic calming techniques, lighting and other safety-related infrastructure, and transportation projects to achieve compliance with the Americans with Disabilities Act of 1990 (42 U.S.C. 12101 et seq).
 - b) Construction, planning, and design of infrastructure-related projects and systems that will provide safe routes for non-drivers, including children, older adults, and individuals with disabilities to access daily needs.
 - c) Conversion and use of abandoned railroad corridors for trails for pedestrians, bicyclists, or other non-motorized transportation users.
 - d) Construction of turnouts, overlooks, and viewing areas.
 - e) Community improvement activities, which include but are not limited to:
 - I. Inventory, control, or removal of outdoor advertising.
 - II. Historic preservation and rehabilitation of historic transportation facilities.
 - III. Vegetation management practices in transportation rights-of-way to improve roadway safety, prevent invasive species, and provide erosion control.
 - IV. Archaeological activities relating to impacts from implementation of a transportation project eligible under this title.
 - V. Streetscaping and corridor landscaping.
 - f) Any environmental mitigation activity, including pollution prevention and pollution abatement activities and mitigation to:
 - I. Address stormwater management, control, and water pollution prevention or abatement related to highway construction or due to highway runoff, including activities described in Title 23 sections 133(b)(11), 328(a), and 329; or
 - II. Reduce vehicle-caused wildlife mortality or to restore and maintain connectivity among terrestrial or aquatic habitats.
 2. Projects eligible under the Recreational Trails Program (RTP) under 23 U.S.C. 206. A “recreational trail” means a thoroughfare or track across land or snow, used for recreational purposes such as pedestrian activities including wheelchair use, skating or skateboarding, equestrian activities, nonmotorized snow trail activities, bicycling or use of other human-powered vehicles, aquatic or water activities, and motorized vehicular activities including all-terrain vehicle riding, motorcycling, snowmobiling, use of off-road light trucks, or use of other off-road motorized vehicles. Permissible uses include:
 - a) Maintenance and restoration of existing recreational trails
 - b) Development and rehabilitation of trailside and trailhead facilities and trail linkages for recreational trails
 - c) Purchase and lease of recreational trail construction and maintenance equipment
 - d) Construction of new recreational trails
 - e) Acquisition of easements and fee simple title to property for recreational trails or recreational trail corridors
 - f) Assessment of trail conditions for accessibility and maintenance
 - g) Development and dissemination of publications and operation of educational programs to promote safety and environmental protection, (as those objectives relate to one or more of the uses of recreational trails, supporting non-law enforcement trail safety and trail use monitoring patrol programs, and providing trail-related training)
 3. The Safe Routes to School program including:
 - a) Infrastructure-related projects eligible under 23 U.S.C. 208(g)(1)
 - b) Non-infrastructure-related activities eligible under 23 U.S.C. 208(g)(2)
 4. Planning, designing, or constructing boulevards and other roadways largely in the right-of-way of former Interstate System routes or other divided highways.

- Ineligible activities include the following:
 1. RTA administrative activities.
 2. Promotional activities, except as permitted within an eligible safe routes to school project.
 3. Routine maintenance and operations, except trail maintenance as permitted by the RTP.
 4. General recreation and park facilities, playground equipment, sports fields, campgrounds, picnic areas and pavilions, or other facilities that do not serve an eligible TA Set-Aside, RTP, or safe routes to school purpose.

Eligible Applicants

- Each application must identify an eligible project sponsor that will assume all responsibility for implementing the project, guarantee the necessary funds are delivered to the project, and is accountable for the use of program funds.
- Projects involving more than one entity must identify a single project sponsor that will be required to enter into a project agreement with the Iowa DOT and will ensure compliance with all local, state, and federal laws, regulations, policies, and procedures.
- The project sponsor will designate a full-time employee to be the Person in Responsible Charge who will supervise all project administration duties, oversee the work performed by consultants and contractors, and coordinate the development of the project with the Iowa DOT.
- Entities eligible to receive TA Set-Aside funds (23 U.S.C. 133(h)(4)(A), as amended by the IIJA) are:
 1. A local government.
 2. A regional transportation authority or transit agency.
 3. A natural resource or public land agency.
 4. A school district, local education agency, or school.
 5. A Tribal government.
 6. The Iowa Northland Regional Transportation Authority.
 7. A nonprofit entity.
 8. Any other local or regional governmental entity with responsibility for or oversight of transportation or recreational trails that the State determines to be eligible, consistent with the goals of 23 U.S.C. 133(h).
 9. The State of Iowa, at the request of an eligible entity listed above.

PUBLIC PARTICIPATION

The RTA strives to engage the public in the transportation planning and programming process. The process to be used during TIP development is outlined in the RTA's Public Participation Plan (PPP), adopted on September 21, 2017 and updated June 18, 2020. An excerpt from the PPP is included later in this document. Two public input sessions were held in June. Documentation and public comments received are included in the *Public Input Documentation* section of this document.

In accordance with INRCOG's Title VI Plan, the RTA also takes specific steps to reach minority and low-income populations and people with disabilities. This includes advertising public input meetings by sending flyers to churches and other religious centers, multi-cultural centers and agencies, and all area media, as well as posting flyers on area buses. Flyers include a short message in Spanish, which is the area's most predominant language other than English. INRCOG has contracted with Language Link to provide telephone translation services if necessary. Information on gender, disability status race, and ethnicity is also collected at public input meetings.

This document includes maps showing the percent of the population that is non-white, speaks English less than "very well", or is below the poverty level. The RTA uses these maps to help ensure that no population is disproportionately affected by proposed projects.

TIP REVISIONS

The TIP is a dynamic document and may need to be revised in between annual updates. There are two types of revisions—administrative modifications and amendments:

- Minor revisions may be made to the TIP as necessary throughout the year. These are considered *administrative modifications*, and may be made by RTA staff without public review and comment or re-demonstration of fiscal constraint. RTA staff will discuss administrative modifications with the Policy Board and Technical Committee, but formal action will not be required.
- Major revisions may also be made to the TIP as necessary throughout the year. These are considered *amendments* and require public review and comment and Policy Board approval. A public hearing will be held at a regularly scheduled RTA Policy Board meeting to consider and approve TIP amendments. A notice of the public hearing will be published no more than twenty (20) calendar days and no less than four (4) calendar days before the date of the hearing.

The following table outlines the differences between administrative modifications and amendments:

	Administrative Modification	Amendment
Project Cost	Federal aid changed by less than 30 percent and total federal aid increases less than \$2,000,000	Federal aid changed by more than 30 percent or total federal aid increases by more than \$2,000,000
Schedule Changes	Changes in schedule for projects in the first four years of the TIP	Adding or deleting a project from the first four years of the TIP
Funding Sources	Changing amounts of existing funding sources	Adding other federal funding sources to a project
Scope Changes	Moving funding between existing states of project scope (i.e. design to construction)	Changing project termini, number of lanes, or significant changes in project type

The Iowa DOT does not make a distinction between amendments and administrative modifications for projects using swapped Primary Road Funds. To take advantage of this increased flexibility, the RTA uses a specific revision process for swapped projects. All changes to swapped projects are considered administrative modifications and may be made by RTA staff without public review and comment or re-demonstration of fiscal constraint. RTA staff will discuss administrative modifications to swapped projects with the Policy Board and Technical Committee, but formal action will not be required.

Transit Justification

FY 2025 OnBoard Public Transit Program of Projects

General Operations, Maintenance, and Planning

Maintaining current day-to-day operations

RPA Transportation Planning

Pursuant to the RTA Transportation Planning Work Program

Replace 3 LD Buses, including Surveillance Cameras

Replacement vehicles per FTA useful life thresholds; all vehicles will be ADA accessible.

2017 Public Participation Plan Excerpt (TIP Development) – Updated June 18, 2020

The TIP identifies all transportation projects in the region that are anticipated to receive federal transportation funding within the next four fiscal years. The TIP is a short-range component that is complementary to the Long-range Transportation Plan. The TIP is updated annually with adoption by the RTA Policy Board in July of each year and incorporated into the Statewide Transportation Improvement Program (STIP) by the Iowa DOT.

The following actions will be undertaken annually to ensure full public participation:

1. Draft TIP
 - a. The draft TIP will be developed by the RTA Technical Committee with input from the Transportation Alternatives Set-aside Program (TAP) Committee. RTA meetings are open to the public.
 - b. The draft document will be available for public review on the INRCOG website, at the INRCOG Center, and upon request.
2. Notices and Public Meetings
 - a. Following development of the draft TIP, at least two (2) public input sessions will be held.
 - b. When a circumstance presents itself where such a meeting in person is impossible or impractical, the RTA may conduct a public input meeting by electronic means.
 - i. The RTA will provide public access to the discussion of the input meeting to the extent reasonably possible.
 - ii. The public announcement of the meeting, at least one week before the public input meeting, shall include the time, the virtual/electronic place, subject matter of the meeting, and the name and phone number of the person available to respond to requests for information about the meeting.
 - iii. The place of the input meeting is the place from which the communication originates or where public access is provided to the discussion.
 - iv. The RTA shall make promptly available to the public, in a place easily accessible to the public, the transcript, electronic recording, or minutes of the discussion and will include a statement explaining why a public meeting in person was impossible or impractical.
 - c. Should in-person meetings be held, at least one (1) public input session will be located in an area identified as being a low-income or minority neighborhood.
 - d. All in person meetings will be held in accessible facilities.
 - e. Information may be presented by INRCOG staff, the Iowa DOT, and member cities and counties.
 - f. The TIP content and public input sessions will be advertised through local media sources. Notices may be posted at governmental offices, public libraries, post offices, transit buses, at the INRCOG Center, and on the INRCOG website and Facebook page. Notices may also be sent to organizations serving traditionally underserved populations.
 - g. Any person with sight, reading, or language barriers may contact the RTA (minimum 48 hours prior to a session) and arrangements will be made for accommodation.

3. Public Comment Period

- a. Written and oral comments will be solicited during public input sessions. At least a 15-day comment period will follow the last public input session, during which comments will be accepted via letter, email, phone, or in person.
- b. A public hearing will be held at a regularly scheduled RTA meeting following the public input sessions to summarize public comments and responses. A notice of the public hearing will be published no more than twenty days and no less than four days before the date of the hearing.

4. Final TIP

- a. Following the public hearing, the RTA will adopt the final TIP, including a summary of comments and responses.
- b. The final TIP will be submitted to the Iowa DOT, the FHWA, and the FTA.
- c. The final TIP will be available on the INRCOG website, at the INRCOG Center, and upon request.
- d. The public participation process associated with the TIP will be evaluated and updated as needed.

5. Revisions

- a. The TIP is a dynamic document and may be revised in between annual updates. There are two types of revisions – administrative modifications and amendments.
 - i. Minor revisions may be made to the TIP as necessary throughout the year. These are considered *administrative modifications*, and may be made by INRCOG staff without public review and comment. INRCOG staff may discuss administrative modifications with the Policy Board and Technical Committee, but formal action will not be required.
 - ii. Major revisions may also be made to the TIP as necessary throughout the year. These are considered *amendments* and require public review and comment and Policy Board approval. A public hearing will be held at a regularly scheduled RTA meeting to consider and approve TIP amendments. A notice of the public hearing will be published no more than twenty days and no less than four days before the date of the hearing.
- b. Any revision to the TIP that adds a new federal aid project or increases a project's federal aid limit will require that a corresponding change be made to another programming entry to ensure the Statewide Transportation Improvement Program (STIP) remains fiscally constrained. This requirement pertains to both administrative modifications and amendments.

The Iowa Northland Regional Council of Governments is an association of local governments that is committed to identifying, securing, and coordinating local, regional, and federal government projects and programs for the enhancement of our region and member communities.

Regional Transportation Authority (RTA)

Program	FY 2025	FY 2026	FY 2027	FY 2028	Total Funding Available
Surface Transportation Block Grant	\$0 May request up to \$799,000	\$0 May request up to \$799,000	\$0 May request up to \$799,000	May request up to \$2.9 Million	\$2.9 Million
Transportation Alternatives Set-Aside	\$0 May request up to \$799,000	\$0 May request up to \$799,000	May request up to \$799,000	May request up to \$799,000	\$799,000

Funding Opportunities

The RTA administers two federal programs that are passed through the Iowa DOT: Surface Transportation Block Grant Program (STBG), and Transportation Alternatives Set-Aside (TA Set-Aside).

The RTA receives approximately \$2,909,000 in STBG funds, and \$307,000 in TA Set-Aside funds annually to program towards transportation projects within the RTA. The process begins with the solicitation of projects at the beginning of the calendar year.

Agendas and Minutes for STBG and TA Set-Aside programming sessions will be posted below.

Contact [Katie Durant](#) with questions about these programs.

Program	Timeline
TA SA Application Deadline	February 9, 2024
STBG Application Deadline	March 15, 2024
TA SA Work Session	March 20, 2024
STBG Work Session	March 21, 2024

STBG

Surface Transportation Block Grant (STBG) Program – This program is designed to address specific issues identified by Congress and provides flexible funding for projects to preserve or improve the condition and performance of several transportation facilities including any federal-aid highway or public road bridge.

- STBG Funding Flyer
- STBG Funding Guidelines
- STBG Application

TA Set-Aside

Transportation Alternatives Set-Aside (TA Set-Aside) – This program provides funding to upgrade the conditions of streets, highways and bridges, provide choices across all modes, accommodate new technologies, and make a more sustainable, resilient, and safer transportation network.

The purpose of these open houses is to solicit comments on the draft FY 2025-2028 Transportation Improvement Programs for the Black Hawk County Metropolitan Planning Organization (MPO) and Iowa Northland Regional Transportation Authority (RTA). The documents identify transportation projects – highway and street improvements, trails, safe routes to school, transit – scheduled to receive federal funding in the next four federal fiscal years in Black Hawk, Bremer, Buchanan, Butler, Chickasaw, and Grundy Counties. The documents can be viewed at www.bhcmmpo.org.

INRCOG staff will be available to discuss the documents and projects identified. No formal presentations will be made.

Please contact Kyle Durant with any questions.

NOTICE OF PUBLIC HEARING

Notice is hereby given that the Iowa Northland Regional Transportation Authority (RTA) will hold a public hearing at the INRCOG Center, 229 E. Park Ave., Waterloo, Iowa, on Thursday, July 18, 2024 at 1:00 p.m.

The purpose of this hearing is to solicit public comment on the draft Transportation Improvement Program (TIP) for fiscal years 2025-2028. This document affects federal transportation programming for persons in Black Hawk, Bremer, Buchanan, Butler, Chickasaw, and Grundy Counties, excluding the Waterloo-Cedar Falls metropolitan area. All transportation projects receiving federal funding must be listed in the TIP, including highway, bridge, non-motorized, transit, and planning projects. Copies of the draft TIP are available at the INRCOG office or can be viewed at www.bhcmpo.org.

It is your privilege to attend this hearing to express your views concerning the draft Transportation Improvement Program, or you may submit your written comments to the Iowa Northland Regional Council of Governments, 229 E. Park Ave., Waterloo, Iowa 50703, through the time and date of the hearing as specified above. Following the hearing, the RTA will consider all oral and written comments before adopting the final TIP and submitting it to the Iowa Department of Transportation.

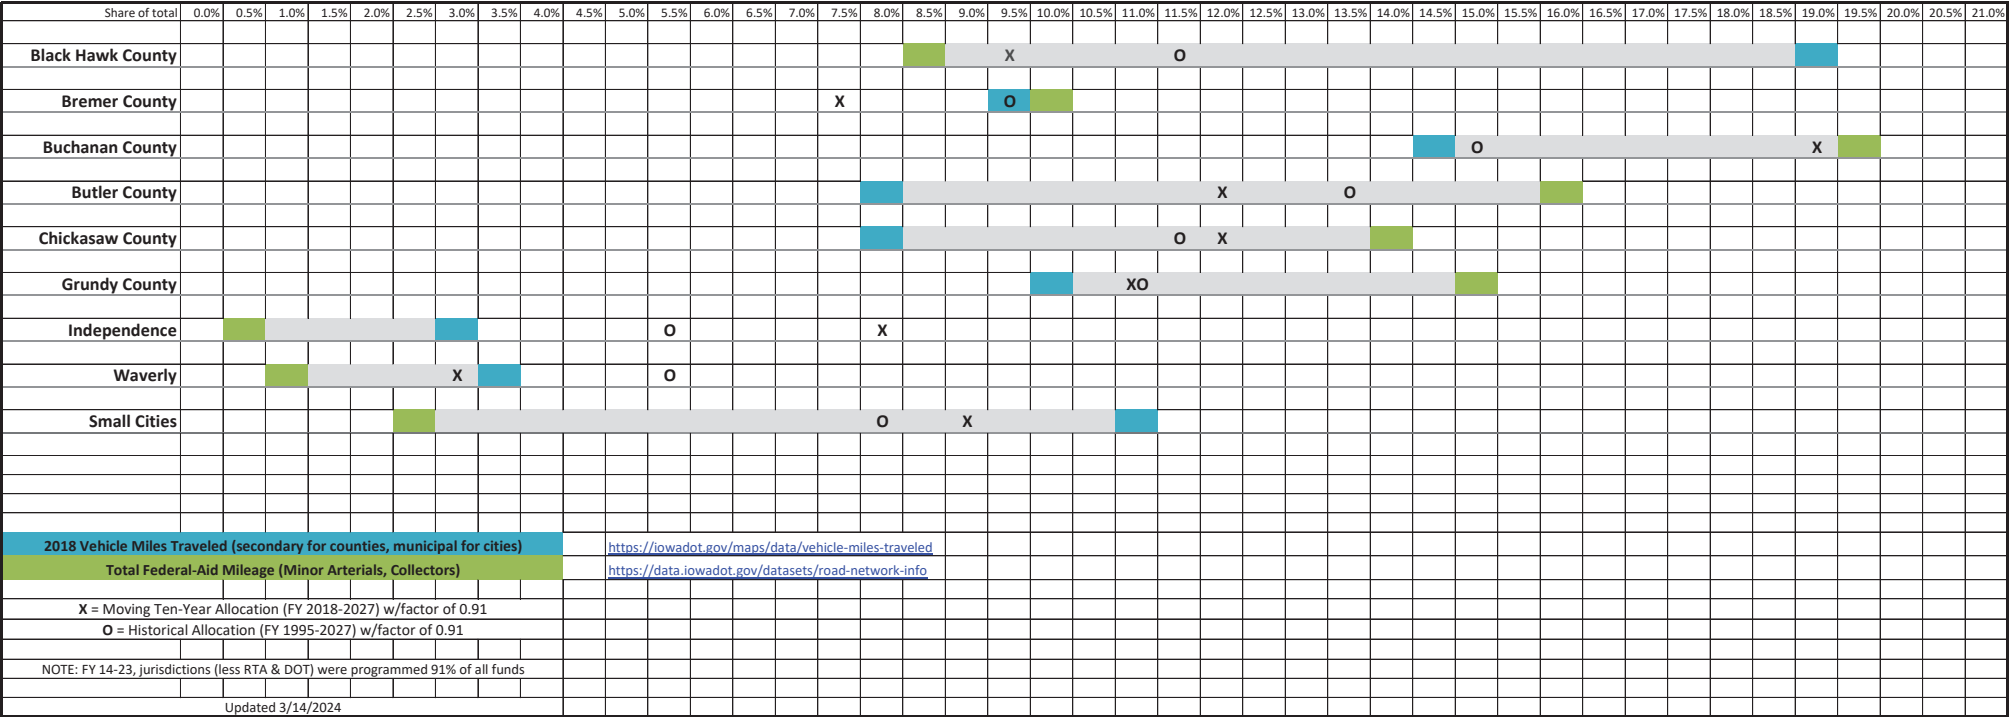

For additional information, you may contact Kyle Durant at (319) 235-0311 between 8:00 a.m. and 3:30 p.m. weekdays or at kdurant@inrcog.org.

Summary, Analysis, and Report on the Disposition of Significant Written and Oral Comments

Historical Allocation (FY 1995-2027) and Moving Ten-Year Allocation (FY 2018-2027) w/factor of 0.91

Methodology for Selecting Highway Bridge Program (HBP) Candidate Projects in the Iowa Northland Region, by County

Black Hawk County

1. Review the list of our Structurally Deficient bridges
2. Rank those bridges by Sufficiency Rating (low to high)
3. Review the list with consideration for traffic volume and alternate available routes
4. Consider whether an embargo has been or can be established to delay replacement; and consider the impact an embargo has on the public (proximity to alternate route/s)
5. Determine whether it is feasible for local forces to repair, reinforce or replace any structures (county forces will only replace structures less than 40 feet long). If so, remove those candidates from consideration for the year.
6. **If:** A bridge's condition is **poor enough to warrant closure**,
and the bridge is **large** and therefore **costly** to replace,
and the bridge is on **a very low volume road**
and there is **an alternate route**
Then: Hold a public meeting to propose **REMOVAL** of the structure**
7. Consider bridge conditions (poor decks, poor sub-structure elements, etc.) that may be remedied by, and qualify for, FA rehabilitation (BHS or BHOS funds)
8. Review the list with consideration for businesses or services impacted (emergency routes, quarries, grain elevators, landfill, county parks, county care facility, etc.)
9. Rank the remaining candidates to determine the best candidates for available HBP funds to:
 - Repair / reinforce by outside contractor or
 - Replace by outside contractor
10. Program the number of bridges that funds allow

**Outcomes of 3 proposals to remove bridges in the last 20 years have been:

In **1992** a large bridge (over \$500,000 replacement cost) was eliminated where an alternate crossing existed 1 mile downstream

In **2004** a bridge (\$350,000 replacement cost) was removed and 1/2 mile of new road was built for \$100,000 which created an alternate route

In **2006** another bridge (\$500,000 replacement cost) was removed and a portion of the road vacated to the adjacent land owners

Bremer County

County bridges that meet the funding requirements of the HBP program:

- The bridge candidate must be classified as structurally deficient or functionally obsolete according to federal guidelines.
- Bridge replacement candidates must have a structure inventory and appraisal (SI&A) sufficiency rating of less than 50 and average daily traffic of at least 25 vehicles.
- Bridge rehabilitation candidates must have an SI&A sufficiency rating of 80 or less and average daily traffic of at least 25 vehicles.

These bridges are reviewed against the latest bi-annual bridge inspection and rating report and are ranked considering road classification, estimate remaining life, posting, and traffic volume.

Buchanan County

1. The County's first priority in budgeting bridge funds is for paved routes. This is an effort to maintain the traffic on the paved routes – there are currently no posted bridges on paved roads.
2. The second priority is the sufficiency rating on the structures along with the traffic counts.
3. The third rating category is based on the length of the structure.

In general, if we can replace the structure with corrugated metal pipe on the rock roads, we will. If a structure is long, has very low traffic, and does not have a low sufficiency rating it will not be replaced at the present time.

Butler County

Utilize inspection reports to develop a list of eligible bridges, then prioritize based on local criteria such as type and amount of traffic, special design considerations, available funds, and staging with other projects.

Chickasaw County

The process begins by reviewing the County Bridge Priority Point Spreadsheet provided to all the counties by the Iowa DOT. Various factors are analyzed such as existing length, width, detour lengths, cost, road classification system, ADT, sufficiency ratings, existing weight restrictions, and total points. Each structure is reviewed to make sure that each qualifies for funding according to the requirements for replacement. Surrounding bridges are reviewed for each potential candidate to make sure there is continuity for the traveling public to allow continued flow of traffic as needed to get to different parts of Chickasaw County.

Typically the worst bridges with the lowest Sufficiency Rating and the highest Total Points become the best candidates for replacement. With normal maintenance/repairs of structures each year along with 12 month/24 month inspections, these potential structures may vary from year to year. Every year this process of review is performed to allow the best candidate bridges to be selected for replacement.

Grundy County

The selection process for HBP projects is done by considering:

1. Condition of bridge
2. Location of bridge (pavement vs gravel) – pavement would have higher priority
3. Traffic count on road
4. Other factors such as other scheduled projects in vicinity that may enhance or deter from HBP project being constructed
